Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Project / Team ID	SWTID-2026-3426
Date	15 March 2026
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

4. Scalability & Future Plan

The solution can be extended as user volume, procurement requests, data, integrations, and workflow complexity increase.

Scalability Aspect	Current State	Proposed Upgrade / Solution
User Load	Suitable for standard laptop requests.	Optimize flows and processing for larger request volumes.
Data Storage	Request and workflow records are tracked.	Improve retention, indexing, and reporting as data grows.
Performance	Automated workflow reduces manual processing.	Tune flow execution and reduce unnecessary steps.
Security	Role-based workflow access.	Strengthen access controls, auditing, and integration security.
