Project Proposal (Proposed Solution)

Date	01 October 2026
Team ID	SWTID-2026-3426
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	5 Marks

Project Overview	
Objective	Automate standard laptop orders from request submission through approval and fulfillment using ServiceNow Flow Designer, reducing manual work and improving visibility.
Scope	Standard laptop request, catalog selection, approval routing, fulfillment task creation, notifications, tracking and closure.
Problem Statement	
Description	Manual procurement may require emails, spreadsheets, approval follow-ups and separate fulfillment updates, causing delays and inconsistent processing.
Impact	Automation can reduce manual coordination, improve consistency, provide status visibility and maintain a traceable request record.
Proposed Solution	
Approach	Create a ServiceNow standard laptop catalog item connected to Flow Designer. The flow validates the request, routes approval, creates fulfillment tasks, sends notifications and updates status until completion.
Key Features	• Standard laptop catalog item • Automated approval routing • Automatic fulfillment task creation • Notifications and status updates • Audit trail and reporting
