Customer Journey Map

Project Name: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Team ID: SWTID-2026-3426
Date: 15 March 2026

Phase / Stage	Actions – What does the customer do?	Touchpoint – What part of service do they interact with?	Customer Thought	Customer Feeling	Process Ownership	Opportunities
Stage 1 – Request	Employee selects the standard laptop option, enters required details and submits the request.	ServiceNow Service Catalog / request form.	“I want to request a laptop quickly and easily.”	Hopeful / focused	Employee + IT Service Desk	Make the form simple; use mandatory fields and standard laptop choices.
Stage 2 – Approval	Request is automatically validated and sent to the appropriate manager for approval.	ServiceNow Flow Designer approval workflow.	“My request should reach the right approver automatically.”	Confident / waiting	Manager / Approver	Automate approval routing, reminders and status updates.
Stage 3 – Fulfillment	After approval, procurement/IT receives the task, processes the laptop order and updates the request.	IT Procurement, inventory/asset records and notifications.	“I want clear updates until my laptop is delivered.”	Satisfied / informed	IT Procurement + Asset Team	Automate fulfillment tasks, track status and notify the requester.

Summary

The journey is streamlined by using Flow Designer to connect request submission, validation, approval, fulfillment and notifications. This reduces manual handoffs and gives the requester clear status visibility.
