Data Flow Diagram – Answer

Project Name: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Team ID: SWTID-2026-3426
Date: 15 March 2026

DFD Components

Symbol / Element	Project Answer
External Entity	Employee / Requester; Manager / Approver; IT Procurement Team; IT Asset Team.
Process 1	Submit Laptop Request – employee submits a standard laptop request with required information.
Process 2	Validate Request – system checks required fields and standard-order conditions.
Process 3	Approval – Flow Designer routes the request to the appropriate approver and records the decision.
Process 4	Procurement / Fulfillment – approved requests create fulfillment or procurement tasks.
Data Store	ServiceNow request records, user/approval information, inventory and asset records.
Data Flow	Request details → validation → approval decision → procurement/fulfillment task → status update → notification.

DFD Flow Sequence

From	Data / Action	To
Employee	Laptop request details	Submit Request
Submit Request	Request record	Validate Request
Validate Request	Validated request	Approval
Approval	Approval decision	Procurement / Fulfillment
Procurement / Fulfillment	Order / asset status	Data Store
Data Store	Current status	Employee / Requester
