Technology Stack – Answer

Project Name: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Team ID: SWTID-2026-3426
Date: 15 March 2026

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side	ServiceNow Service Catalog / Portal	Provides a structured request form and user-facing experience for standard laptop orders.
2	Backend / Server-Side	ServiceNow Flow Designer	Automates validation, approvals, task creation, notifications and workflow transitions.
3	Database / Data Storage	ServiceNow Platform Tables	Stores request, user, approval, task and asset-related information.
4	Cloud / Hosting / Deployment	ServiceNow Platform	Provides the managed environment for workflow execution and application deployment.
5	Version Control & CI/CD	ServiceNow Update Sets / Application Development Tools	Supports controlled movement and maintenance of configuration changes.
6	Third-Party APIs / Other Tools	ServiceNow Notifications and Integration Capabilities	Enables status communication and supports future integration with procurement or inventory systems.

Technology Flow

Layer	Technology	Role in Project
User Interface	ServiceNow Service Catalog / Portal	Employee submits and tracks a laptop request.
Automation	Flow Designer	Validates, routes approvals, creates tasks and sends notifications.
Data	ServiceNow Tables	Stores request, approval, task and asset information.
Deployment	ServiceNow Platform	Hosts and runs the automated procurement workflow.
